**BlackRock Capital Investment Corporation Reports Financial Results for the Quarter Ended March 31, 2022, Declares Quarterly Cash Distribution of \$0.10 per Share**

- GAAP Net Investment Income (“GAAP NII”) was \$6.5 million, or \$0.09 per share, up 9% from the prior quarter, providing first quarter distribution coverage of 88%, up from 80% in the prior quarter.
- Adjusted Net Investment Income<sup>1</sup> (“Adjusted NII”) was \$6.0 million, or \$0.08 per share, providing first quarter adjusted distribution coverage of 82%, down slightly from 84% in the prior quarter. GAAP NII and Adjusted NII include fee and other one-time income of \$0.01 per share.
- Net Asset Value (“NAV”) decreased slightly to \$346.9 million, down 0.8% from \$349.7 million at the end of 2021; NAV per share decreased by 0.6% to \$4.70 per share from \$4.73 per share at the end of 2021.
- Gross deployments totaled \$44.0 million during the first quarter, substantially all in senior secured debt. During the first quarter, 9 new portfolio companies were added, bringing total portfolio companies at quarter-end to 93, up from 86 at the end of 2021 and 55 at the end of 2020. Gross repayments during the first quarter were \$78.7 million, including \$45.2 million from full repayment and exit of St. George Warehousing and Trucking Co. (“St. George”), previously the Company’s largest investment.
- Net leverage was 0.46x as of March 31, 2022, and was down from 0.56x as of December 31, 2021, primarily driven by net investment dispositions during the first quarter. Total available liquidity for deployment into portfolio company investments, including cash, was approximately \$248 million, subject to leverage and borrowing base restrictions.
- Under the existing share repurchase program, 106,308 shares were repurchased during the first quarter for approximately \$0.4 million at an average price of \$4.14 per share, including brokerage commissions.
- On April 21, 2022, the Company entered into a Master Note Purchase Agreement (the “Note Purchase Agreement”) governing the issuance of \$92.0 million in aggregate principal amount of senior unsecured notes (the “Notes”) in two tranches to qualified institutional investors in a private placement. The Company will issue \$35 million in aggregate principal amount of Notes with a fixed interest rate of 5.82% and \$57 million in aggregate principal amount of Notes bearing interest at a rate equal to the Secured Overnight Financing Rate (“SOFR”) plus 3.14%. The Notes will be issued at a closing expected to occur on June 9, 2022, subject to customary closing conditions. The Notes will mature on December 9, 2025 unless redeemed, purchased or prepaid prior to such date. For more information, please refer to the Form 8-K as filed with the Securities and Exchange Commission (“SEC”) on April 22, 2022.

**New York, May 2, 2022** – BlackRock Capital Investment Corporation (NASDAQ:BKCC) (“BCIC” or the “Company,” “we,” “us” or “our”) announced today that its Board of Directors declared a quarterly distribution of \$0.10 per share, payable on July 7, 2022 to stockholders of record at the close of business on June 16, 2022.

<sup>1</sup>Adjusted NII excludes the “hypothetical liquidation” basis capital gains incentive fee accrual (reversal) required under GAAP of approximately \$(0.5) million in the first quarter of 2022 and \$0.3 million in the fourth quarter of 2021, respectively (refer to Supplemental Information for further details).

“We started 2022 with solid progress on our commitment to draw upon the power of the BlackRock platform to build a diversified portfolio with solid risk-adjusted returns, focusing on senior secured debt and first lien loans in particular. We added nine new portfolio companies, each of which was a first lien investment. We ended the quarter with 93 portfolio companies, up from 86 at the end of 2021, 55 at the end of 2020, and 47 at the end of 2019. Gross deployments were \$44 million in the first quarter – almost entirely in first lien loans. Approximately 72% of the portfolio consists of first lien investments, fairly consistent with the prior quarter-end, and up from 50% at the end of 2020 and 34% at the end of 2019,” said James E. Keenan, Chairman and Interim CEO of the Company. “We also experienced prepayments in the quarter of approximately \$79 million, of which \$45 million was from the full exit and repayment of St. George, previously our largest portfolio company by fair value. The investment in St. George, which was initiated in 2018, resulted in a 12.4% IRR to the Company. While the St. George exit will have the immediate impact of reducing leverage and investment income, it also reduces exposure to a large single issuer and facilitates further portfolio diversification,” Mr. Keenan added.

“As previously announced, on April 21, 2022, we accessed the private placement market to issue Notes in an aggregate principal amount of \$92.0 million. The Notes have a delayed funding date of June 9, 2022. We anticipate using the proceeds from the Notes as well as availability under our revolver to redeem our \$143.75 million of outstanding 5.00% unsecured convertible debt at or prior to its June 15, 2022 maturity date. We are pleased with the execution we obtained on the Notes including the issuance size, pricing and prepayment features. Our net leverage was 0.46x at March 31, 2022, down from 0.56x at the end of 2021, due to net repayments we received during the first quarter. We continue to have ample leverage capacity as we pursue disciplined portfolio growth that we expect will be accretive to NII and provide increased dividend coverage for our stockholders.” Mr. Keenan concluded.

## Business Updates

- **Issuance of Senior Unsecured Debt:** On April 21, 2022, the Company entered into the “Note Purchase Agreement” governing the issuance on June 9, 2022, of \$92.0 million in aggregate principal amount of Notes in two tranches to qualified institutional investors in a private placement. The Company will issue \$35.0 million in aggregate principal amount of Notes with a fixed interest rate of 5.82%, and \$57.0 million in aggregate principal amount of Notes bearing interest at a rate equal to SOFR plus 3.14%. The Notes have a maturity date of December 9, 2025. The Company may prepay the Notes at its option, subject to a prepayment premium, in an amount equal to 2% during the first year, 1% during the 2<sup>nd</sup> year, 0.5% during the 3<sup>rd</sup> year and zero thereafter. In addition, the Company will be obligated to offer to repay the Notes at par if certain change in control events occur. The Notes are general unsecured obligations of the Company that rank *pari passu* with all outstanding and future unsecured unsubordinated indebtedness issued by the Company. Additionally, the Company has entered into an interest rate swap agreement with a notional value of \$35.0 million for the first three years of the Notes’ term, pursuant to which the Company will pay a floating rate of interest equal to SOFR and will receive a fixed rate of interest equal to 2.633%. For more information, please refer to the Form 8-K as filed with the SEC on April 22, 2022.
- **Other Junior Capital Exposure:** As of March 31, 2022, the Company’s other junior capital (including unsecured/subordinated debt and equity) exposure, excluding non-core assets, remained low at 6% of the portfolio, consistent with the prior quarter, and down from 21% at December 31, 2020, and 40% at December 31, 2019.
- **Share Repurchase Program:** On November 2, 2021, the Company’s Board of Directors authorized the Company to purchase up to a total of 8,000,000 shares, effective until the earlier of November 2, 2022, or such time that all the authorized shares have been repurchased. During the first quarter, 106,308 shares were repurchased for \$440,237 at an average price of \$4.14 per share, including brokerage commissions. As of March 31, 2022, 7,800,586 shares remained authorized for repurchase.

## First Quarter Financial Updates

- GAAP NII was \$6.5 million, or approximately \$0.09 per share, for the three months ended March 31, 2022 (and Adjusted NII was \$6.0 million or \$0.08 per share). Relative to distributions declared of \$0.10 per share, GAAP NII distribution coverage was 88%, up from 80% from the prior quarter; Adjusted NII distribution coverage was 82% for the first quarter, down slightly from 84% in the prior quarter. As we continue to re-deploy capital into assets consistent with our core strategy, we expect our earnings power to improve in the coming quarters.
- NAV decreased modestly to \$346.9 million at March 31, 2022, down 0.8% from \$349.7 million at December 31, 2021. NAV per share decreased 0.6% to \$4.70 per share quarter-over-quarter.
- For the quarter ended March 31, 2022, we incurred management fees of \$2.1 million, and incentive fees based on income of \$19,013.
- GAAP requires that the capital gains incentive fee accrual consider unrealized capital appreciation, as a capital gains incentive fee would be payable if such unrealized capital appreciation were realized on a “hypothetical liquidation” basis. Additionally, if the resulting calculation amount is negative, the accrual for GAAP in a given period may result in the reduction or reversal of incentive fees on capital gains accrued in a prior period. For the quarter ended March 31, 2022, a capital gains incentive fees reduction of \$(0.5) million was recorded on that basis (refer to Supplemental Information below for further details). At March 31, 2022, the balance of accrued incentive fees on capital gains was approximately \$1.1 million. However, such amount was not realized nor payable as of such date. There can be no assurance that such unrealized capital appreciation will actually be realized in the future, or that any accrued capital gains incentive fee will become payable under our investment management agreement or the Investment Advisers Act of 1940. Amounts ultimately paid under the investment management agreement will be consistent with the formula reflected in the agreement.

The weighted average internal investment rating of the portfolio at FMV at March 31, 2022 declined slightly to 1.25 as compared to 1.21 at December 31, 2021 and improved from 1.72 at March 31, 2021.
- During the quarter ended March 31, 2022, net realized and unrealized losses were \$(1.0) million, primarily attributable to spread widening during the quarter.

- For the first quarter of 2022, the Company declared a cash dividend of \$0.10 per share, payable on July 7, 2022 to stockholders of record at the close of business on June 16, 2022.

(1) Net investment income and per share amounts displayed above are net of the reversal for incentive fees on capital gains which is reflected on a hypothetical liquidation basis in accordance with GAAP for the three months ended March 31, 2022. Refer to Supplemental Information section below for further details and as adjusted figures that reflect that there were no incentive fees on capital gains realized and payable to the Advisor during such periods.

## Supplemental Information

The Company reports its financial results on a generally accepted accounting principles (“GAAP”) basis; however, management believes that evaluating the Company’s ongoing operating results may be enhanced if investors have additional non-GAAP basis financial measures. Management reviews non-GAAP financial measures to assess ongoing operations and, for the reasons described below, considers them to be effective indicators, for both management and investors, of the Company’s financial performance over time. The Company’s management does not advocate that investors consider such non-GAAP financial measures in isolation from, or as a substitute for, financial information prepared in accordance with GAAP.

The Company records its liability for incentive fees based on capital gains by performing a hypothetical liquidation basis calculation at the end of each reporting period, as required by GAAP, which assumes that all unrealized capital appreciation and depreciation is realized as of the reporting date. It should be noted that incentive fees based on capital gains (if any) are not due and payable until the end of the annual measurement period, or every June 30. The incremental incentive fees disclosed for a given period are not necessarily indicative of actual full year results. Changes in the economic environment, financial markets and other parameters used in determining such estimates could cause actual results to differ and such differences could be material. There can be no assurance that unrealized capital appreciation and depreciation will be realized in the future, or that any accrued capital gains incentive fee will become payable. Incentive fee amounts on capital gains actually paid by the Company will specifically exclude consideration of unrealized capital appreciation, consistent with requirements under the Investment Advisers Act of 1940 and the Company’s investment management agreement. For a more detailed description of the Company’s incentive fees, please refer to the Company’s Annual Report on Form 10-K for the fiscal year ended December 31, 2021, on file with the Securities and Exchange Commission (“SEC”).

Computations for the periods below are derived from the Company’s financial statements as follows:

<sup>1</sup> **Pre-Incentive Fee:** Amounts are adjusted to remove all incentive fees. Such fees have been accrued (reversed) but are not due and payable at the reporting date.

<sup>2</sup> **As Adjusted:** Amounts are adjusted to remove the GAAP accrual (reversal) for incentive fee based on capital gains, and to include only the incremental incentive fee based on income. Adjusted amounts reflect the fact that no incentive fee on capital gains was realized and payable to the Advisor during the three months ended March 31, 2022 and 2021, respectively. Under the Current Management Agreement, incentive fee based on income is calculated for each calendar quarter and may be paid on a quarterly basis if certain thresholds are met. Amounts reflect the Company’s ongoing operating results and reflect the Company’s financial performance over time.
