Internal Investment Rating System Overview

BlackRock Capital Investment Advisors, LLC (the “Advisor”)¹⁴ employs a grading system for its entire portfolio in which all loans are rated on a scale of 1 to 4. This system is intended to reflect the performance of the borrower’s business, the collateral coverage of the loans and other factors considered relevant. The following is a description of the conditions associated with each investment rating:

- **Grade 1:** Investments in portfolio companies whose performance is substantially within or above the Advisor’s expectations and whose risk factors are neutral to favorable to those at the time of the original investment or subsequent restructuring.
- **Grade 2:** Investments in portfolio companies whose performance is below the Advisor’s expectations and that require closer monitoring; however, the adverse impact may be deemed temporary, and the most likely outcome is that no loss of investment return (interest and/or dividends) or principal is expected.
- **Grade 3:** Investments in portfolio companies whose performance is below the Advisor’s expectations and for which risk has increased materially since origination or subsequent restructuring. Some loss of investment return is likely, but no loss of principal is expected. Companies graded 3 generally present a higher risk of liquidity pressure and/or covenant breach over the next six to twelve months.
- **Grade 4:** Investments in portfolio companies whose performance is materially below the Advisor’s expectations where business trends have deteriorated and risk factors have increased substantially since the original investment or subsequent restructuring, potentially resulting in a breach of covenants or other event of default. Investments graded 4 are those for which some loss of principal or invested capital is likely.

Notes to the Investor Presentation

1. Income statement data per share excludes the impact of diluted weighted average shares outstanding.
2. Includes PIK interest and dividends earned during the period presented.
3. As adjusted: Amounts are adjusted to remove the incentive management fee expense based on gains, as required by GAAP, and to include only the incremental incentive management fee expense based on Income. Until March 6, 2017, the incremental incentive management fee is calculated based on the current quarter's incremental earnings, and without any reduction for incentive management fees paid during the prior calendar quarters. After March 6, 2017, incentive management fee expense based on income is calculated for each calendar quarter and may be paid on a quarterly basis if certain thresholds are met. Amounts reflect the Company's ongoing operating results and reflect the Company's financial performance over time. The Company's investment advisor had agreed to waive the incentive fee based on income through December 31, 2018, which was extended to June 30, 2019. The Advisor voluntarily waived a portion of its incentive fees based on income from July 1, 2019 through December 31, 2020.

Pre-Incentive Fee: Amounts are adjusted to remove all incentive management fees. Such fees are calculated but not necessarily due and payable at this time.
4. Balance sheet per share data utilizes total shares outstanding at end of period.
5. Net leverage is calculated as the ratio between (A) and (B) at the end of respective periods: (A) debt, excluding unamortized debt issuance costs, less available cash and receivable for investments sold, plus payable for investments purchased and legal settlement payable, if applicable, (B) net asset value.
6. Total investment portfolio excludes cash and cash equivalents.
7. Asset coverage ratio represents the ratio of total assets less non-debt liabilities to total indebtedness. On May 1, 2020, the Company's stockholders approved a reduction in the minimum asset coverage ratio requirement from 200% to 150%, which went into effect on May 2, 2020.
8.
